ABOUT THE COMPANY

Our team comes from a strong civil engineering background with over 17 years of experience in **Alucobond** ACM cladding, where precision and watertight detailing are critical. We apply that same level of expertise to building signage, ensuring our fixing brackets maintain the integrity and waterproofing of the building envelope. That's why we developed an innovative system using **Alloyboard** 3D letters with concealed inserts—allowing for secure, minimal fixings that protect the cladding while delivering a clean, professional finish.

We use the latest CNC technology and digital 3D modeling to turn creative ideas into real, high-quality products. We're not just making signs—we're engineering them. We use advanced equipment, including a large-format CNC machine, a fully automated PUR edge banding system, and a specialized machine for 3D letter edgebanding.

We work closely with **signwriters** to make their art to product and use a modern aluminum Alloyboard (aluminum honeycomb panel) to create frameless, lightweight, and strong signage systems. By combining ACM with our **Alloyboard**, we produce unique, flat-pack signs that are easy to ship and install.

Signage Products

We offer a wide range of signage solutions, including:

- Wall Signage
- Projecting Signage
- Pylon Signage
- Hanging Signage
- Directional Signage
- Building Façade Signage
- Box Signage
- 3D Letters & Logos
- Road signage
- Event signage

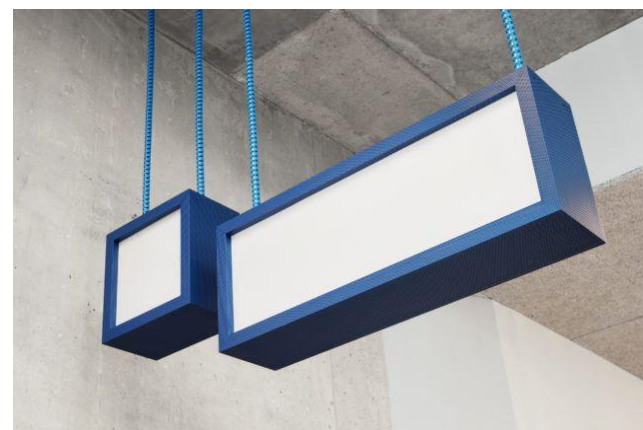

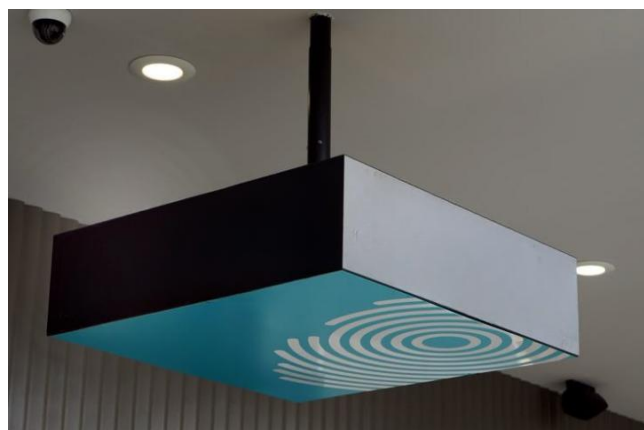

Each product is available as a solid board for vinyl application or as a lightbox.

3D letters & insert ACM frame can be added for extra details

There are no limits to the design or possibilities.

All brackets & fixings designed & sell separately

3D letters & logo

Bold. Lightweight. Built to Last.

We offer a groundbreaking solution for large-scale signage with our uniquely engineered 3D

And logos made from high-strength, lightweight aluminum honeycomb panels. Designed in various sizes and depths, these freestanding letters feature hidden brackets and internal mechanical fixings—suitable for both indoor and outdoor installations.

Our system eliminates the need for structural engineers or heavy lifting equipment. Whether mounted on rooftops, walls, or at ground level, installation is quick and simple, without requiring additional reinforcement of buildings.

Choose from solid-face or illuminated options, with surfaces ready for vinyl wrapping, spray painting, or finished in our industrial-grade PVDF coatings available in two standard colors. Thanks to their strength and stability, our letters can be manufactured in giant sizes while maintaining structural integrity.

These are not just signs—they're statements

Solid Free Standing

Alloyboard 3D letters are lightweight, durable, and perfectly prepared for vinyl wrapping or custom paint finishes.

Over Building

Free standing letters with hidden framed structure & fixings

Projecting Sign

LUXURY AT ITS BEST

Our Projecting sign could be made of single ACM board or single **Alloyboard**, it could be a box or a lightBox

There are no limits to the design or possibilities.

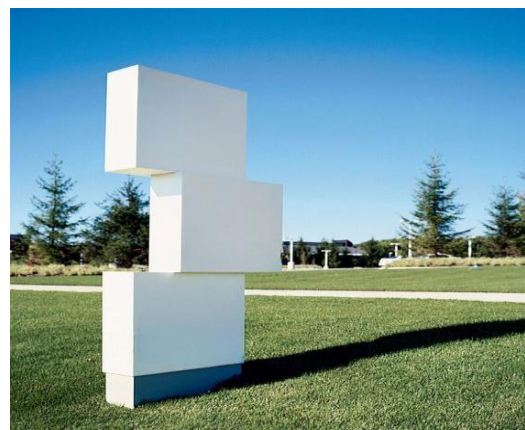

All brackets & fixings designed & sell separately

Pylon WITH OUR LATEST STYLE

Frame-Less pylon signage could be a dream for any **signwriter**,

There are no limits to the design or possibilities.

All brackets & fixings designed & sell separately

Blocks pylon

Architecturally designed with a sculptural, artistic finish. It can feature clean, simple edges or be enhanced with integrated 3D letters and logos for added impact.

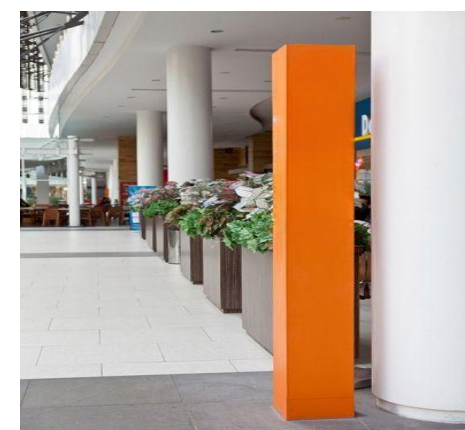

Wall pylon

Simple wall pylon, could have illuminated letters or logo, no fixings to hide

Sandwich Pylon

Our innovative pylon features a sandwich-insert design, available in three models to suit different signage styles. It's ideal for integrating graphics and is also available with optional **illumination**.

Building pylon

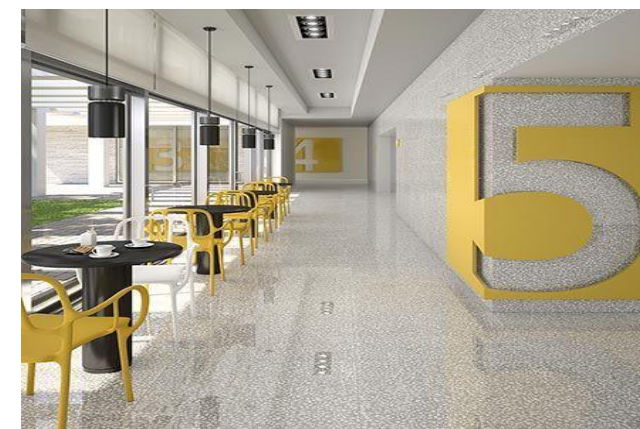

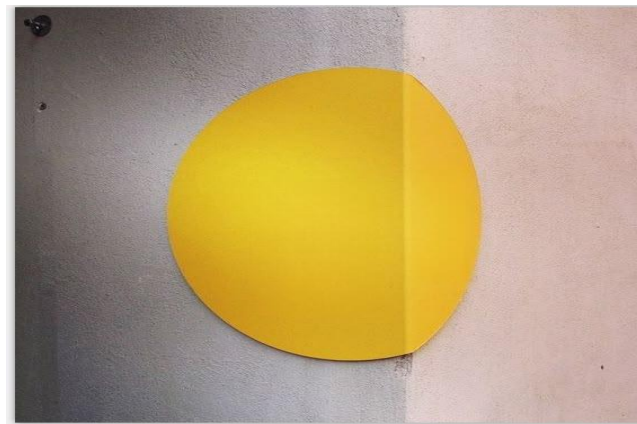

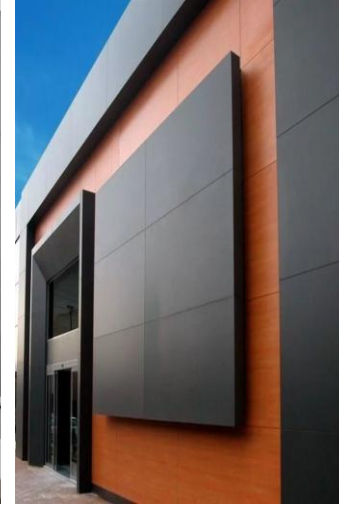

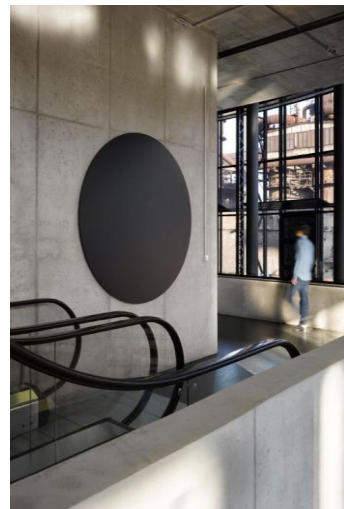

This pylon can be designed as a tower-style box or with an angular two-sided shape, offering a bold and modern presence on building entrance.

Corner & Wall signage

Corners signage provide a great opportunity to display your business from two different angles, maximizing visibility and impact.

These signs can be made from durable aluminum composite panels or **Alloyboards**, and can include 3D elements, & **signwriter** vinyl graphics, or internal LED lighting for added visibility—day or night

These could be made of folded ACM or **Alloyboards**

Hanging & Direction Signage

MODERN Look

Unleash Unlimited Creativity with
Express Signwriter Graphics

Bring your boldest ideas to life with our ultra-lightweight yet remarkably strong boards—designed for limitless expression. Perfect for both indoor and outdoor use, these signs can be fully customized in size, shape, and finish to suit your vision. Their minimal weight allows for quick and easy installation, often eliminating the need for heavy brackets or complex structural support.

Road & Event Signage

With additions

These are non-permanent signs designed for easy relocation—ideal for daily use or during events, markets, or temporary road setups. We custom-build each sign to suit the theme or artistic style of the occasion, making them both functional and visually appealing.
